Products and Services that Integrate with CostGuard Software

Vendor Transport Interfaces

- Ben E. Keith
- Cheney Brothers
- eSysco
- Food Services of America (FSA)
- Gordon Food Services
- GFS/Canada
- PFG/Carroll
- Reinhardt Foodservice (RFS/Tracs Direct)
- Renzi Brothers
- Sysco (eSysco, Sysco/Canada, S.A.M., Customer Companion)
- U.S. Foodservice
- Also with software providers Retalix/IDS and IDS/Powersell

This capability alone will save you countless hours. If your supplier can provide and accept data electronically, then **Vendor Transport** is for you.

Point of Sale Interfaces

- "Open" systems: Aloha, Action Systems, Digital Dining, Future POS, HSI, Maitre'D, NEC CRS 4000, Point-of-Success, Posera, PosiTouch, QuickTouch, RMS, Sable, SellWise, Squirrel, Touch'n'Serve, TouchMenu, VersaTouch.
- "Proprietary" systems: Casio, Comptrex, CRS, Datasym, NCR, Omron, Panasonic, PC/POLL, Sharp, TEC.
- MICROS: all models, include e7
- Club systems: IBS (Integrated Business Systems)

The **POS Interface** reads the sales mix directly into Sales Analysis for reporting.

Accounting Interfaces

- Quickbooks 2004 Pro or higher
- Peachtree
- DMS
- MAS90 (Mcabe)
- Passport

Exports receipts from Inventory into Accounts Payable. There's no need to re-key invoice information into your accounting software! We can even distribute the same invoice over multiple cost-of-goods categories (such as food and supplies).

Catering Interfaces

- CaterEase
- CaterMate
- CaterWare

CostGuard has terrific features to manage catering events, from costing through production. You don't need a catering system, but if you have one, then the **Catering Interface** transfers recipe costing information for accurate bidding and proposals.

Liquor Control Interfaces

- Accardis
- Accubar

CostGuard does a terrific job of controlling liquor costs all by itself. But if are you using a specialized bar and liquor control inventory system, the **Liquor Control Interface** imports counts from those systems into CostGuard.

NOTE: Each interface also has a documented 'standard' layout that allows for easy integration with applications that aren't listed.
